Mathematics Department – University of California, Santa Barbara

Instructor: Victor Grigoryan  Course #: 174B  Quarter: W 11

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCE Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

   Strength: 1) Nice
   2) Organized
   3) Fair
   4) Wrote well.

   Should stay as permanent teacher.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   Very applicable.

Continue on back if necessary.

    He has a very good knowledge of the subject matter and explains everything extremely well. If someone has a question he has no problem stopping the lecture and clarifying.
    Overall he is an excellent teacher.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

    The course was very interesting and overall a little difficult but very manageable.
Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. Continue on back if necessary.

He was one of the best instructors I've ever had. He made the material understandable and he was able to someone who has never taken a physics class before.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

The course was difficult; the book is pretty good, the instructor was extremely thorough.

Continue on back if necessary.

   Excellent  
   (Consistently did a good job of class time,  
   and consistently So). Always coherent and  
   organized lectures, which gave me time to actually  
   work/study the material rather than  
   reassemble lecture material at home.  
   I would take another class with Viktar  
   next quarter, but I've already taken the  
   course he is teaching.

2. Please comment on the course (for example: Content, level of difficulty,  
   textbook, physical conditions of the room and chalk or white boards, suggestions  
   for improvement, advice to students who might take this class, etc.) Continue on

Continue on back if necessary.

Grigoryan's class has been the most interesting and easy to follow math class I have taken at UCSB. He is always willing to help and offers more office hours than are necessary at the point that we take them for granted. The material presented is easy to follow and he continuously engages the class.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

The class is relatively difficult on the analytical side, but easy on the numerical. The classroom is always fine. All students should take 144 with people they know.
