   The material was organized in a cohesive manner.

16. Could the instruction of this course be made more effective? If so, how? (If you need more space please attach further comments.)
   It would have been helpful to have more examples in class and to move at a slightly slower pace. In addition, when asking questions in class, especially with regards to homework, the professor often seemed uninterested and/or unwilling to answer questions. This was frustrating and made me less likely to take advantage of that learning opportunity.

   (If you need more space please attach further comments.)

   There were many opportunities in the class to try and understand how to improve the
   concepts in class because we received many homework problems. Also, the teacher provided
   time at the beginning of each class to answer questions.

16. Could the instruction of this course be made more effective? If so, how? (If you need more space please attach further

   The example problems in class were a lot easier than those on the homework.
   It would have been better if we did the more challenging problems in class.

8. How would you evaluate your overall participation in this course? (If you need more space please attach further comments.)
   I would say I participated a great deal. I did all the homework, attended every lab, and attempted every homework problem. In lab I tried to ask questions in order to get help but often got discouraged because I felt as if my questions were seen as unimportant or stupid.

15. What were the particular strengths in the instruction of this course? Please give examples where appropriate.
   (If you need more space please attach further comments.)
   The timeline and structure of this class was straightforward and the outline was followed closely to the
textbook.

16. Could the instruction of this course be made more effective? If so, how? (If you need more space please attach further
   comments.)
   I feel as if the instructor could have been more engaging towards me. I was turned off very early
   on in the class and whenever I asked a question the professor would often make me feel unintelligent.
   There was once a time when the professor responded with "you should have asked the question a little
   earlier and then wrote the formula down." The professor could have slowed down and made the material
   more understandable; I felt like he complicated the material more than necessary and didn't take enough
   time to make sure the fundamental topics were clearly understood. Also, I don't think homework was helpful
   at all and would have loved to only have book problems.

Section Three: Course Outcomes - This section asks you to rate outcomes which courses often have. Any given course
will have some of these outcomes, and others will not be applicable (na).

4. Overall, how did you benefit from this course? (If you need more space please attach further comments.)
   I benefited from this course mainly because I received 4 credits toward my major. Beyond that
   I don't really think I benefitted.

Section Four: General Comments - Please use this space to make any additional comments regarding this course.
These comments are highly valued by instructors. Instructors also may pose specific questions for you to answer in
this section. (If you need more space please attach further comments.)
I can tell that the professor is a very intelligent individual. I just think he needs to slow down and explain
topics more concise. There were many times where I felt like I had to teach myself material. Also I think
he needs to be more approachable. There were many days in class where it didn't seem like he wanted
the class and didn't engage with students. This led me to feel very discouraged and ended up really disliking
this class and professor.
