Grade Comparisons

The purpose of this document is to provide you contextual information about your grades from last semester. Comparisons are made between the average grade in your course and grades in other courses at Oxy over the past 5 years.

Name = Grigoryan, Viktor  
Course = MATH 120, Calculus 2  
Term = 2013 Fall Semester  
Department = Mathematics  
Division = Sciences  
Number of students (who received a letter grade) = 28

The numbers in the upper left box are the mean and standard deviation of grades in your course. The numbers in the boxes separated by a comma are the mean and standard deviation of grades for the comparison group. The percentages show an estimate of the fraction of grades higher than the average grade in your course for the comparison group.

Completing this questionnaire will help you evaluate your contribution to this course; it will also help instructors to improve the quality and effectiveness of their courses. Results from course evaluations will also be used in the faculty evaluation process. Please answer the questions printed below thoughtfully. This form will not be returned to the instructor until after grades have been turned in.

6. I came to class on time......................................................................................... Always
7. I had conversations with other students outside of class about topics discussed in this class................................................................. Never Always
8. How would you evaluate your overall participation in this course? (If you need more space please attach further comments.)
   Overall, I did an okay job participating. I took notes and occasionally asked questions, however I should have asked more questions in class when I was confused.

Section Two: The Instructor - This section asks you to evaluate the instructor of this course.

1. The instructor communicated his/her goals for this course................................. Strongly disagree
2. The instructor fulfilled his/her goals for the course.............................................. Strongly agree
3. The instructor organized information in a logical and cohesive fashion.............. Strongly disagree
4. The instructions for assignments and/or laboratories were made clear............. Strongly disagree
5. The instructor communicated criteria for grading exams and assignments.... Strongly agree
6. The instructor provided helpful information regarding your performance on assigned work (e.g., as exams, papers, oral presentations and lab reports) Strongly disagree

8. How would you evaluate your overall participation in this course? (If you need more space please attach further comments.)

   "**Not much. It's a fast-paced lecture course.**"

**Section Two: The Instructor - This section asks you to evaluate the instructor of this course.**

1. The instructor communicated his/her goals for this course…………………………………

2. The instructor fulfilled his/her goals for the course…………………………………

3. The instructor organized information in a logical and cohesive fashion…………………………………

4. The instructions for assignments and/or laboratories were made clear…………………………………

5. The instructor communicated criteria for grading exams and assignments…………………………………

6. The instructor provided helpful information regarding your performance on assigned work (e.g., as exams, papers, oral presentations and lab reports).
Section Two: The Instructor - Continued

7. When the instructor explained concepts, the explanations were clear.

8. The instructor stimulated intellectual enthusiasm for the material presented.

9. The instructor invited students to confer with him/her regarding this course.

10. The instructor encouraged questions from students.

11. The instructor directed questions to students to encourage critical analysis.

12. The instructor was responsive to students' questions about the material.

13. The instructor provided a classroom environment in which you could learn from people of different backgrounds.

14. Overall, the instruction in this course was excellent.

15. What were the particular strengths in the instruction of this course? Please give examples where appropriate.

(If you need more space please attach further comments.)

Lots of time to do hw/problems during lab section times.
Got to work together in groups.

16. Could the instruction of this course be made more effective? If so, how? (If you need more space please attach further comments.)

- Yes, a slower & clearer explanation of concepts - calculus II is difficult & not everyone learns/understands @ the same pace.
- More variety of examples per concept in class to ensure that concept is understood. (In-class worksheets...)
- More hw problems from textbook rather than webwork - it's time-consuming & hard.

Section Three: Course Outcomes - This section asks you to rate outcomes which courses often have. Any given course will have some of these outcomes, and others will not be applicable (na).

1. This course increased my basic knowledge and comprehension of the subject.

2. This course improved my ability to analyze, synthesize and/or apply information regarding the subject.

3. This course increased my knowledge, skills, and/or personal development in the following areas:
   a) Writing clearly and effectively.
   b) Speaking clearly and effectively.
   c) Reading critically and analytically.
   d) Thinking critically and analytically.
   e) Analyzing and/or solving problems.
   f) Working effectively with others.
   g) Working independently.

4. Overall, how did you benefit from this course? (If you need more space please attach further comments.)

I learned many concepts of calculus, but also that it's difficult to teach.
Completing this questionnaire will help you evaluate your contribution to this course; it will also help instructors to improve the quality and effectiveness of their courses. Results from course evaluations will also be used in the faculty evaluation process. Please answer the questions printed below thoughtfully. The labs were good places to participate. I liked how we used labs as a place to do homework because it's easier to seek help as you're completing homework.

I think the labs were very helpful because doing homework while being able to ask you questions is the best learning experience. I find your 1 on 1 instruction generally more helpful than the actual class.

16. Could the instruction of this course be made more effective? If so, how? (If you need more space please attach further comments.)

Sometimes when you ask us to do example problems on our own I feel like you don't give us enough time to try them before you start doing them.

If you need more space please attach further comments.

Grigoryan is very smart and very good at explaining things clearly and in many different ways. Concepts and pictures on the board were helpful and class time was used well. On most days, class was engaging. I liked when Grigoryan went on brief tangents about his life and further/higher level uses of the math we learned.

16. Could the instruction of this course be made more effective? If so, how? (If you need more space please attach further comments.)

I think the packets were very useful, many make more of those especially with important theorems and formulas highlighted. Packets or brief notes about the class are very helpful.

   Definitely showed enthusiasm for the material and clearly wanted us to succeed. I liked the in-class discussions more than just lecture because we could work on the homework as a group and learn from each other as well as being able to ask for help. It was more useful with actual learning them just hearing about the concepts in class.

16. Could the instruction of this course be made more effective? If so, how? (If you need more space please attach further comments.)
   Sometimes topics in class were covered too quickly and there didn't have time to sink in so repeating certain topics and equations a second day might be helpful. Sometimes the webwork were really hard and I wouldn't know how to do them so I'd get discouraged and give up. Maybe having hints on them would be useful.

   - Homework helped us practice problems that we recently learned but sometimes was tedious because the numbers were large or difficult to work with.
   - Lab helped us talk to each other about problems & professor was available to explain/help when needed.

16. Could the instruction of this course be made more effective? If so, how? (If you need more space please attach further comments.)
   - Varies were a brand new concept to me. I wish we had spent some more time on the subject.
   - Work problems / application of integration was difficult to do at first because we did not go over many examples in class. Would like to have done more types of examples.
