

NORTH AMERICAN SCHOOLS OFFERING ACTUARIAL SCIENCE COURSES INCLUDING ACTUARIAL MATHEMATICS - 1999

The following list identifies schools in Canada, Mexico and the U.S. which offer actuarial science courses, including regularly scheduled classes covering substantially all of the topics on the Society of Actuaries (SOA) Course 150, Actuarial Mathematics. It is not necessary, however, to attend one of these universities or to study actuarial science as an undergraduate to become an actuary.

The courses offered at these schools include many of the topics the SOA courses cover, although these courses may not be identical to the SOA syllabus. Students are encouraged to contact the individual schools for more detailed information on their actuarial science programs. The Society of Actuaries *does not* accredit or approve college or university actuarial science programs. For SOA syllabus information, students should consult the Society of Actuaries *Associateship and Fellowship Catalog*.
