MARRIAGE: SAME-SEX
We must transform our society from one that makes narrow, but good, of gender expression, social expectations the norm to one that makes truly meaningful the full, free expression of self. We must transform our language, our society, and the way we see the world. We must transform the way we think about relationships, the way we see the value of love and companionship, the way we see the importance of social acceptance and importance.

Since the beginning of time, marriage has been a symbol of love, commitment, and family. It has been a way to ensure that our children are loved and cared for, that our families are protected and that our society is strong. Marriage is a powerful way to ensure that our children are loved and cared for, that our families are protected and that our society is strong.

undoubtedly, the increased sexual expression would clearly be a step in the right direction. Women who do not seek the same level of approval in their sexuality, but choose to express themselves in their own way, often find themselves in a challenging position. The struggle for recognition and acceptance by mainstream society is a constant battle. The idea of a woman being seen in a positive light, is often clouded by the societal norms that dictate how women should express themselves. If a woman were to express herself in a way that contradicts the societal expectations, she might face a uphill battle against the conformity that defines modern society.}

Transforming the very fabric of society, gay liberation is the key to unlocking the parameters of sexuality and familial norms, and in the process, the community of gay and lesbian people becomes more accepted and visible. This is true even more than setting up our own communities and living spaces. These groups have a powerful role in shaping the future of our society, and we should all work to support them.
