## Homework #8

[8 points]

**ASSIGNED: Tue Apr 21 2020**

**DUE: Tue Apr 28 2020**

### Modern Mathematicians

This assignment is about creating a mathematical biography of a modern mathematician.

In at least 250 words write a short synopsis of a mathematician we have not previously discussed in class (i.e. they don't appear in Worksheets 8 or 9) who was born after 1945 (i.e. 75 years ago) and is either alive or dead. If you like you may write about two mathematicians with biographies of at least 100 words each. You should include a sentence which explains why you selected this mathematician to write about. (Put the word count at the end of the biography.)
